

Welcome to the New GeoNB Map Viewer

The GeoNB Map Viewer has been upgraded to make some common tasks easier and quicker. A few of the highlights are:

1. Moving around in the map is simpler with the new map controls
2. The most common tools are accessible in the tool bar with only one click
3. Changing the basemap or adding more map layers is quicker

The GeoNB Map Viewer still provides access to the best and freshest map data available from the Government of New Brunswick and some municipal governments including: property maps, civic addresses, roads, rivers, lakes, streams, air photos, parks, crown lands, wetlands, flood risk areas, etc.

The address for the GeoNB Map Viewer has not changed – <http://geonb.snb.ca/geonb>. All you need to use the GeoNB Map Viewer is a web browser and the Adobe Flash Player plugin.

We hope you find the changes beneficial. If you require assistance with the changes please refer to the help document located under the information folder on the tool bar. If you need further assistance please send us an email at geonb@snb.ca.
